

Jesus Lopez

Summary of Objectives

Motivated Software Engineer with 5+ years of experience in fast-paced development and collaborative environments with 3+ years experience in building modern web, mobile, and backend applications with a new vision of strengthening and expanding expertise. Proven success in leadership and development versatility; modernizing legacy systems and using industry standard development tools serving high-volume enterprise clients. Experienced in maintaining design systems, writing well-tested code, and delivering responsive user experiences. Strong communicator with demonstrated ability to follow team efforts and technical decisions in high-agency and ambiguous environments.

Strength in taking ownership of tasks from start to finish and showing exemplar success in going above and beyond expectations. Demonstrated ability to navigate road blocks in task executions without fear of learning and exploring untreaded territories.

I openly welcome any opportunity to discuss my background, problem-solving abilities, expertise, and enthusiasm.
